

# Stall DRY®

## Absorbent & Deodorizer

### for WATER CLEAN UP

*FEMA recommends that flooded areas be cleaned up as quickly as possible in order to dry out the area and reduce mold contamination.*

**Use Stall DRY to assist in drying up moisture that remains after the bulk of the water from a flood has been removed.**

With the ability to **absorb** up to **130%** of its own weight in liquid, Stall DRY will **remove** unwanted **moisture** and dry out the treated area and will also **suppress odors** found in liquids, leaving a cleaner, fresher and **healthier environment**.

Stall DRY can be used on wood, concrete and other sub-floor materials in flooded basements, rooms and garages.

#### **DIRECTIONS FOR USE:**

1. Remove all excess water with water vac, mop or other suitable device
2. Once the bulk of the water has been removed, apply up to 1/4 inch of Stall DRY on top of the floor
3. Let sit for up to 24 hours
4. Sweep up
5. Dispose of used material

*\* If moisture and/or odor still remains, re-apply Stall DRY and allow to sit for up to an additional 24 hours. If absolutely necessary, repeat once again.*

#### **Please note:**

Stall DRY is an all natural product and can safely be disposed of at landfill sites.

#### **For carpeted areas:**

In order to dry the surface under wet carpet, remove all carpeting and have cleaned and dried by professional carpet service before re-installing. Apply Stall DRY to either wood, concrete or other sub-floor materials, as described above.

***A 40 lb bag of Stall DRY will cover an area of up to 100 ft.<sup>2</sup>***
