## **TIPS FOR YOUR SHOW PIG PROJECT**

Make sure your show pigs have a constant supply of clean, fresh water at all times.

It is important to have a deworming schedule throughout your show season. The use of a calendar and planned worming dates is a good way to remember this crucial management point.

The growing stage is not the time to start holding weight gain on your show pig. Show pigs at this stage are putting on proper muscle tissue as well as developing correct skeletal make up. It is important to maintain their energy demands during this phase of life.

Start an exercise program at least 45 days prior to show to help build stamina for the show ring.

Chart weights weekly and stay on target with your desired weight.

Start conditioning hair and skin at least 30 days prior to the show date which will give you an advantage with the show look.

Keeping pens dry and clean with good air flow is important for top performance.

*We Feed Champions*
