Feed Supreme. Win Supreme.

Supreme Performance
Enhanced Swine Feeds

A next generation swine show feed program formulated to bring out the full potential in every pig.

SUPREME KICKSTART

CP: 20% LYSINE: 1.4% FAT: 5.8%

Highly digestible show swine starter enhances early bloom in young pigs and is a great feed for pigs going to sale. For pigs weighing from 15 to 50lbs.

SUPREME LAUNCH

GET THEM OFF THE LINE FAST

CP: 18% LYSINE: 1.1% FAT: 5.8%

High-protein, easy-digesting starter/grower to ignite appetite, skeletal growth, and muscle foundation from day one. Perfect for building the base that sets champions apart early!

SUPREME TURBO

BOOST PERFORMANCE AND DRIVE GROWTH

CP: 16% LYSINE: 0.85% FAT: 6.2%

Formulated for maintaining a smooth, balanced appearance. Ideal for the middle phase when pigs are maturing and need steady, controlled development.

SUPREME OVERDRIVE

ENHANCE BLOOM AND FINISH

CP: 14% LYSINE: 0.8% FAT: 7.8%

A high-fat, low-protein conditioner built to add cover, smoothness and that clean, full-bodied, ring-ready look. Helps pigs stay fresh and flexible while maintaining muscle tone.

SUPREME CHILL OUT

CONTROL GROWTH AND HOLD CONDITION

CP: 10% LYSINE: 0.8% FAT: 6%

Use on pigs that are overly muscled or growing too fast. Designed to maintain body shape, appetite and freshness when it's time to slow them down and perfect the final look before show day.

THE FLEXIBILITY YOU NEED. THE CONTROL YOU WANT.

Each formula is crafted to provide precise control of muscle, growth, and condition from start to finish - allowing you to make calculated adjustments and achieve your target look for the show ring.

Produced locally in our family owned and operated mill in California; delivered fresh to your local dealer.

Healthy Gut. Stronger Performance.

A pig's digestive system is the engine of performance. A healthy gut supports stronger immunity, improves feed efficiency and fuels predictable growth.

Powerful Enzyme Blend

Our multi-enzyme blend optimizes the nutrient values in the feed and consistently outperforms other enzymes with feed efficiencies resulting in up to 3-lb. weight gains.

Medicated

BMD (bacitracin methylene disalicylate) protects against swine dysentery, improves feed efficiency and increases rate of weight gain without a withdrawal period.

Pre and Probiotics

Our multi-mode pre and probiotic combination supports gut integrity, immunity and nutrient utilization. Establishing a healthy microbiome stimulates natural immune responses reducing antibiotic use, creates a resilient gut environment for stable, consistent weight gain and reduces stress related scours and feed intake issues.

Organic Trace Minerals

Chelated, proteinate trace minerals enhance bioavailability for optimized growth momentum.

Botanical Blend

Supports digestive function, stimulates appetite, adds flavor, reduces stress, provides anti-septic, bacterial, fungal, viral and anti-inflammatory properties.

Highly Palatable

Our ground grain based feeds are uniquely flavored to capture the pigs interest and to keep them engaged.

Champion Litters Don't Happen By Chance

Supreme Sow feeds are built for breeders who want the largest, healthiest and most viable litters. They are optimized for feed energy, milk quality and production, increased litter sizes, more live births and healthier weaning weights while maintaining the sow's body condition.

SUPREME SOW GESTATION

CP: 13% LYSINE: 0.75% FAT: 4.5%

SUPREME SOW LACTATION MASH

CP: 15.5% LYSINE: 1% FAT: 4.8%

**Supreme Swine Show Feeds
Built for the Show Ring
